To whom it May Concern

On behalf of the Lotherton Community residents I believe my community would benefit from the community renovation project because we don't have space in Lotherton community to do programs or workshop for the seniors, kids and youths because we have limited space and we can't hold much programs or people in the available room because it is too small, it could only hold about 10 people in there. Lotherton is a very diverse community.

It will be a very good asset to have when we are planning workshops and programs and other activities that can benefit the community. Plus we will also have a space to have a food drive and where we can plan events, trips and childcare programs.

This renovation will be so good because it will be helping us build stronger connections within the community and it would give us the opportunity to expand our connections and give us the chance to do even more for the families in need. As we would have more space to store food, clothes and other necessities.

Yours Sincerely

Olisa Baker
